Certificates

PROJECTS

Bank Locker security system using face and liveliness detection (Academic Project)
Our project implements a bank locker security system integrating facial recognition and liveliness detection mechanisms. By leveraging technologies image matching algorithm, Pyhton, HTML, CSS, CNN we ensure secure access to bank lockers while mitigating the risk of unauthorized entry This system offers a robust solution to safeguard valuable assets stored in bank lockers.

EXTRA-CURRICULAR ACTIVITIES

Sports, Volunteering in activities , Peer tutoring , Blog writing .
